INTRODUCTION

PROJECT BACKGROUND

The travel sector is an integral part of the New York economy. Visitors generate significant economic benefits to households, businesses, and government alike and represent a critical driver of the state's future. In 2023, tourism-supported jobs accounted for 7.4% of all jobs in the state.

By monitoring the visitor economy, policymakers can inform decisions regarding the funding and prioritization of the sector's development. They can also carefully monitor its successes and future needs. This is particularly true for New York as it builds upon its visitor economy.

METHODOLOGY AND DATA SOURCES

An IMPLAN input-output model was constructed for the state of New York. The model traces the flow of visitor-related expenditures through the state's economy and their effects on employment, wages, and taxes. IMPLAN also quantifies the indirect (supplier) and induced (income) impacts of tourism. Tourism Economics then cross-checked these findings with employment and wage data for each sector to ensure the findings are within reasonable ranges.

Visitors included those who stayed overnight or traveled more than 50 miles to the destination.

The primary source of the employment and wage data is the Regional Economic Information System (REIS), maintained by the Bureau of Economic Analysis.

This is more comprehensive than Bureau of Labor Statistics (ES202/QCEW) data because sole-proprietors do not require unemployment insurance and are not counted in the ES202 data.

By establishing a timeline of economic impacts, the industry can track its progress.

To quantify the significance of the visitor economy in New York, Tourism Economics developed a comprehensive model detailing the far-reaching impacts arising from visitor spending. The results of this study show the scope of the visitor economy in terms of direct visitor spending, along with total economic impacts, jobs, and fiscal (tax) impacts in the broader economy.

The analysis draws on the following data sources:

- Longwoods International: survey data, including spending and visitor profile characteristics for visitors to New York
- Bureau of Economic Analysis and Bureau of Labor Statistics: employment and wage data, by industry
- STR lodging performance data, including room demand, room rates, occupancy, and room revenue, for hotels
- Tax collections: lodging and sales tax receipts
- US Census: business sales by industry and seasonal second homes inventory
- Tourism Economics: international travel data for overseas, Canadian, and Mexican travel to New York based on aviation, survey, and credit card information

ECONOMIC IMPACTS

KEY FINDINGS

VISITOR SPENDING

In 2023, visitors to New York spent \$88 billion across the state economy. Visitor spending increased more than \$9 billion, registering double-digit percentage growth for a third consecutive year.

TOTAL ECONOMIC IMPACT

The direct visitor spending impact of \$88 billion generated a total economic impact of \$137 billion in New York in 2023 including indirect and induced impacts. This total economic impact generated \$11 billion in state and local tax revenues in 2023.

VISITS & VISITOR SPENDING

After a full post-pandemic recovery in 2022, both visitor volumes and spending in New York State again achieved new record highs in 2023. Topping 306 million visitors, including both domestic and international, volumes increased 5% year-over-year. An increase of more than \$9 billion over the previous year, visitor spending in New York grew 12% year-over-year, a third consecutive year of double-digit growth.

VISITOR SPENDING

Visitors to New York spent \$88 billion across a range of sectors in 2023.

Visitor spending expanded 12% in 2023, reaching \$88 billion.

Of the \$88 billion spent in New York in 2023 by visitors, lodging, including the value of second homes and spending on short-term rentals, accounted for \$29 billion, 33% of all visitor spending. Spending on food and beverages resulted in \$22 billion.

Retail, including spending at service stations, captured 17%, a total of \$15 billion.

Transportation, including both air and transportation within the destination, comprised 15%, with recreation spending registering 10% of each visitor's budget.

\$88 BILLION

Visitor Spending in 2023

Source: Tourism Economics

Note: Lodging spending is calculated as an industry. Spending also includes dollars spent on second homes and short-term rentals. Transport includes both air and local transportation.

SPENDING TRENDS

Visitor spending increased 12% in 2023, a third consecutive year of double-digit percentage growth. Spending grew across all sectors, driven by continued strong year-over-year growth in visitor volumes and increases in prices of key commodities.

Recreation and entertainment spending led overall growth as visitors returned to urban centers and prioritized experiential activities. Lodging spending, including second homes and short-term rentals, increased 13% as overnight visitors continued to face strong average daily rate (ADR) growth versus the prior year.

Transportation increased 15% in 2023, led by strong growth in air transportation.

While domestic visitor spending remains the dominant force to New York's visitor economy, spending growth from Canadian and overseas visitors outpaced that of domestic. Overseas visitor volumes and spending remained below 2019 levels.

ECONOMIC IMPACT METHODOLOGY

Our analysis of the New York visitor economy begins with direct visitor spending and analyzes the downstream effects of this spending on the broader economy. To determine total economic impact, we input direct spending into a model of the New York economy, constructed using an IMPLAN input-output (I-O) model. The model traces the full extent of industry impacts as dollars flow through the local economy.

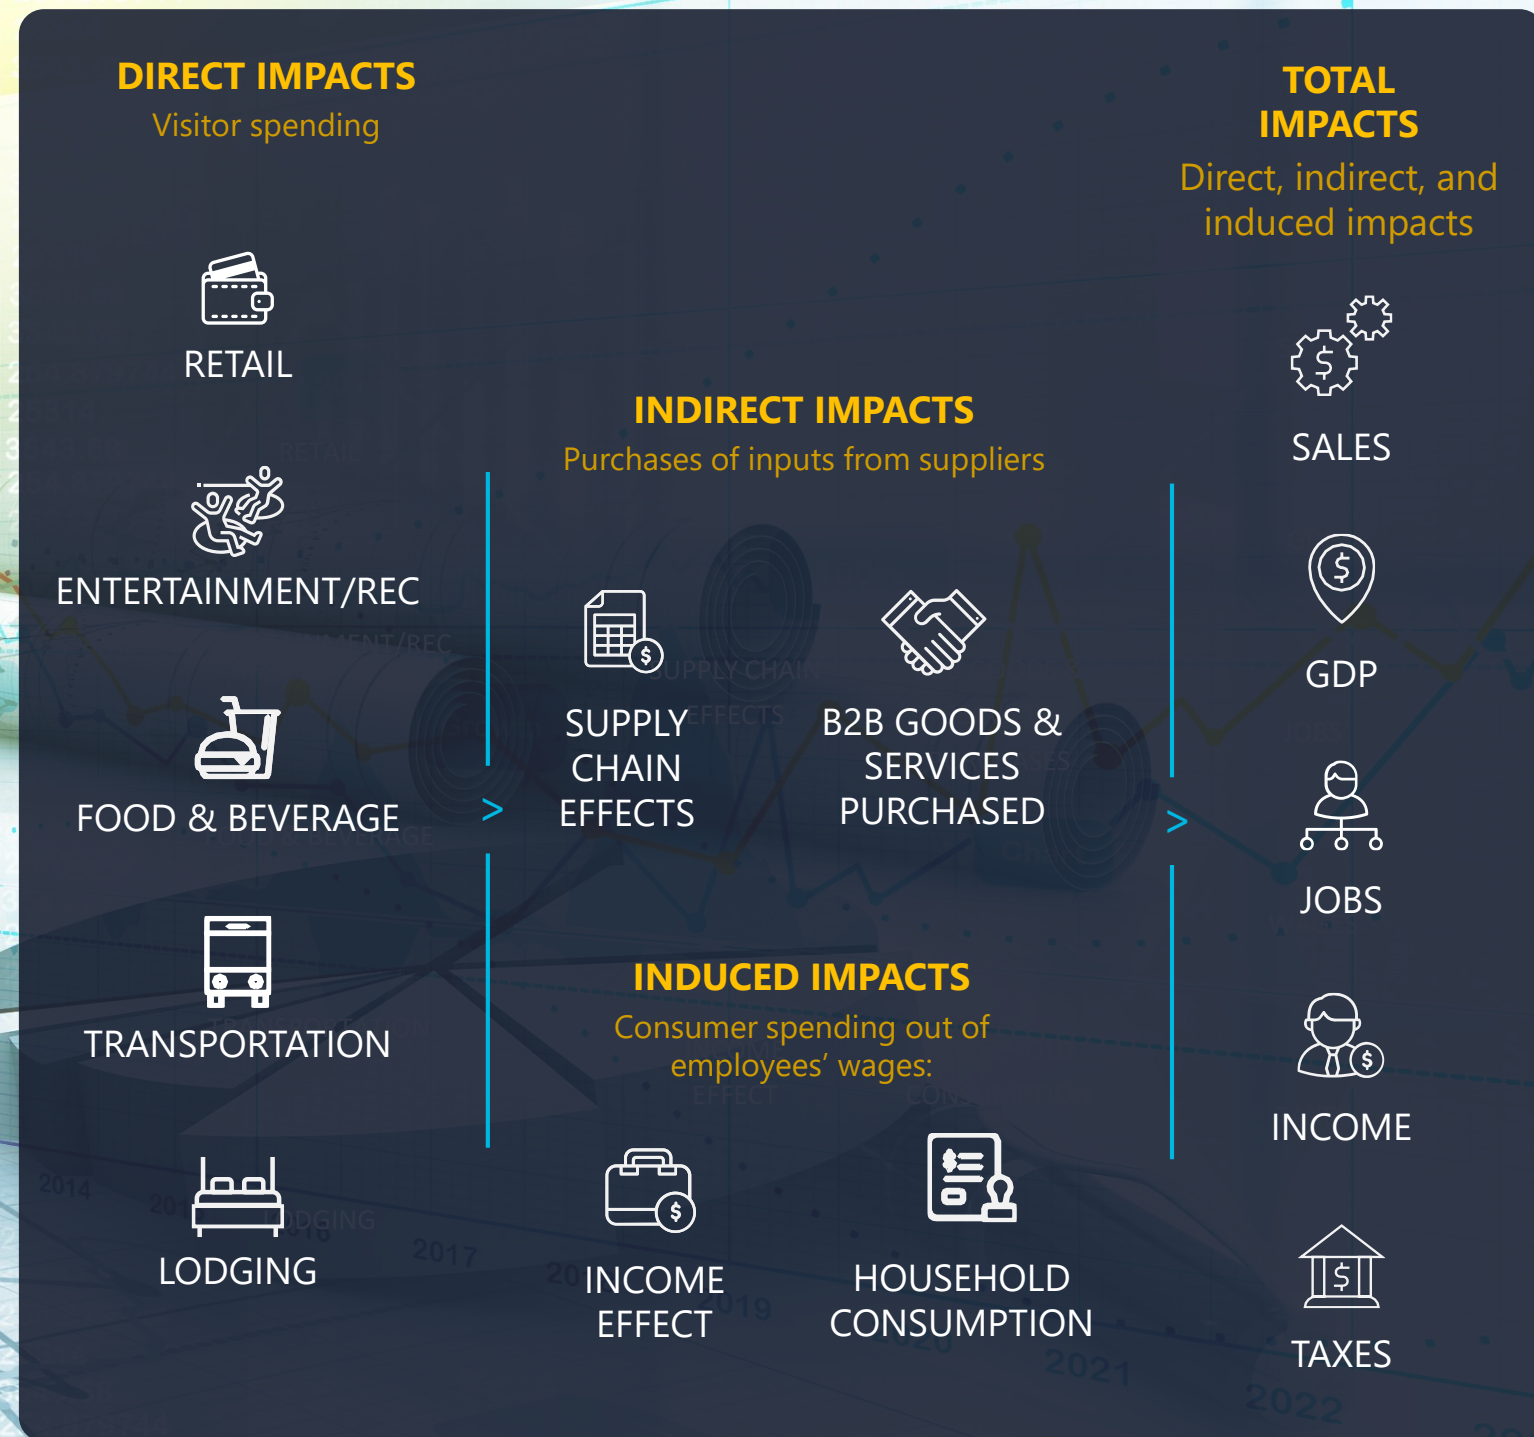

An I-O model represents a profile of an economy by measuring the relationships among industries and consumers and quantifies three levels of impact:

1. **Direct impacts:** Visitor spending creates direct economic value within a discrete group of sectors (such as recreation and transportation). This supports a relative proportion of spending, jobs, wages, and taxes within each sector.
2. **Indirect impacts:** Each directly affected sector also purchases goods and services as inputs (e.g. food wholesalers, utilities) into production. These impacts are called indirect impacts or supply-chain effects.
3. **Induced impacts:** Lastly, the induced impact is generated when employees whose wages are generated either directly or indirectly by visitor spending spend those wages in the local economy. This is called the induced impact or income effect.

The Tourism Economics model calculates these three levels of impact - direct, indirect and induced - for a broad set of indicators, including:

- Spending
- Wages
- Employment
- Federal Taxes
- State Taxes
- Local Taxes

ECONOMIC IMPACT FRAMEWORK

ECONOMIC IMPACT FINDINGS

BUSINESS SALES IMPACTS

Visitors contributed a direct impact of \$88 billion in 2023. This direct impact generated \$49 billion in indirect and induced impacts, resulting in a total economic impact of \$137 billion in the New York economy, 11% more than a year earlier.

Outside of direct impacts, significant benefits accrued in sectors like finance, insurance, and real estate, and business services.

ECONOMIC IMPACT FINDINGS

FISCAL (TAX) IMPACTS

Visitor spending, visitor supported jobs, and business sales generated \$22 billion in government revenues.

State and local taxes alone tallied \$11 billion in 2023.

Each household in New York would need to be taxed an additional \$1,420 to replace the visitor-generated taxes received by New York state and local governments in 2023.

Fiscal (tax) Impacts

Amounts in \$ millions

REGIONAL SUMMARY

VISITOR SPENDING BY REGION

New York State is divided into 11 vacation regions.

The state experienced another year of strong growth in 2023, as its urban centers recovered.

The New York City tourism region had the largest volume of visitor spending in 2023 (61% of state-wide spending) and saw the largest increase in visitor spending as travel demand picked-up.

Source: Tourism Economics

Visitor spending across the upstate regions of New York, excluding New York City and Long Island, is more evenly distributed.

In Upstate New York, visitor spending was largest in Central New York (19%), followed by Hudson Valley (18%) and the Finger Lakes (16%).

Upstate Visitor Spending by Region

Percentage of Upstate New York visitor spend

Source: Tourism Economics

RELIANCE ON TOURISM

Tourism is an integral part of each region's economy, generating from 6% to 18% of total employment. The tourism industry is a very significant contributor to the economy of the Adirondacks and Catskills, encompassing 18% and 15%, respectively. Despite the strong recovery in spending, the recovery in visitor supported jobs has been slower as pandemic related labor force distortions continued to affect tourism-centric industries.

Tourism share of regional employment

COUNTY DISTRIBUTION

In 2023, visitor spending and tourism-related employment grew to \$2.3 billion and 19,844 jobs, respectively. Visitor spending in the Adirondacks in 2023 increased by 7% over 2022 levels.

Relative to 2022, traveler spending was up most in Essex County, with 11% growth.

Essex and Warren Counties represented 39% and 38% of the region's tourism sales, registering \$910 million and \$888 million, respectively.

APPENDIX

Glossary – Spending Definitions

Term	Description
Lodging	Includes visitor spending in the accommodation sub-sector. This includes food and other services provided by hotels, rentals and similar establishments.
Food and beverage	Includes all visitor spending on food & beverages, including at restaurants, bars, grocery stores and other food providers.
Recreation	Includes visitor spending within the arts, entertainment and recreation sub-sector.
Shopping	Includes visitor spending in all retail sub-sectors within the local economy.
Local transport Service stations	Includes visitor spending on local transport services such as taxis, limos, trains, rental cars, buses, and the local share of air transportation spending. Visitor spending on gasoline.
Second homes	Where applicable, spending associated with the upkeep of seasonal second homes for recreational use as defined by the Census Bureau.

Glossary – Economic Impact Definitions

Term	Description
Direct Impact	Impacts (business sales, jobs, income, and taxes) created directly from spending by visitors to a destination within a discreet group of tourism-related sectors (e.g. recreation, transportation, lodging).
Indirect Impact	Impacts created from purchase of goods and services used as inputs (e.g. food wholesalers, utilities, business services) into production by the directly affected tourism-related sectors (i.e. economic effects stemming from business-to-business purchases in the supply chain).
Induced Impact	Impacts created from spending in the local economy by employees whose wages are generated either directly or indirectly by visitor spending.
Employment	Employment is measured by the Bureau of Economic Analysis (BEA) and Bureau of Labor Statistics (BLS) definitions, and captures full-time and part-time jobs, which includes salary and wage employees and proprietors.
Labor Income	Income (wages, salaries, proprietor income and benefits) supported by visitor spending.
Value Added (GDP)	The economic enhancement a company gives its products or services before offering them to customers.
Local Taxes	City and County taxes generated by visitor spending. This includes any local sales, income, bed, usage fees, licenses and other revenues streams of local governmental authorities – from transportation to sanitation to general government.
State Taxes	State tax revenues generated by visitor spending. This will include sales, income, corporate, usage fees and other assessments of state governments.

ABOUT TOURISM ECONOMICS

Tourism Economics is an Oxford Economics company with a singular objective: combine an understanding of the travel sector with proven economic tools to answer the most important questions facing our clients. More than 500 companies, associations, and destination work with Tourism Economics every year as a research partner. We bring decades of experience to every engagement to help our clients make better marketing, investment, and policy decisions. Our team of highly-specialized economists deliver:

- Global travel data-sets with the broadest set of country, city, and state coverage available
- Travel forecasts that are directly linked to the economic and demographic outlook for origins and destinations
- Economic impact analysis that highlights the value of visitors, events, developments, and industry segments
- Policy analysis that informs critical funding, taxation, and travel facilitation decisions
- Market assessments that define market allocation and investment decisions

Tourism Economics operates out of regional headquarters in Philadelphia and Oxford, with offices in Belfast, London, Frankfurt, Ontario, and Sydney.

Oxford Economics is one of the world's foremost independent global advisory firms, providing reports, forecasts and analytical tools on 200 countries, 100 industrial sectors and over 3,000 cities. Our best-of-class global economic and industry models and analytical tools give us an unparalleled ability to forecast external market trends and assess their economic, social and business impact. Headquartered in Oxford, England, with regional centers in London, New York, and Singapore, Oxford Economics has offices across the globe in Belfast, Chicago, Dubai, Miami, Milan, Paris, Philadelphia, San Francisco, and Washington DC, we employ over 600 full-time staff, including 350+ professional economists, industry experts and business editors—one of the largest teams of macroeconomists and thought leadership specialists.
